The typical opening day, beer drinking, bait slingers have some twisted perspectives. I have heard some truly idiotic statements such as, " Suckers eat trout. " Another example is a story i heard about a group of idiots on Redbank Creek (a warm water river that recieves spring stockings, no permanent trout population, or any chance of one.) These yahoo's were throwing northern pike on the bank, because they were afraid the pike would kill all of the stocked trout, makes me sick.....
