A good book to consider adding to all the fly fishing literature on your night stand is Eric Stroup's new title, "River Pimp."

-I've enjoyed many of the new "technique" titles out this year--some really good ones are on the shelves. However, Eric's new book makes for an easy, relaxing read. It tells the story of what it's like to be a fly fishing guide. The anecdotes and stories are great! I never knew how tough that business can be. It's a good, fun book--congrats to Eric for telling his story.
