George maurer-fundamentals of building a bamboo fly rod. I own about every rod building book and still find mauers book to be my go to source. It's very clear and straight forward.

This is a great book. Cattanach also has a great book on split cane. If you're just building the rod up from a blank I have always referred to L.A. Garcia's book "Handcrafting a Graphite Fly Rod". It is focused on the finishing of a blank. Guides, reel seats, thread wrapping, epoxy. Careful, its a slippery slope.
