CCAS was out on a wade trip this past weekend in Southeastern PA. We were out with a good friend of CCAS and had a decent day after some heavy rains. Of course this time of year nymphing was the game and the stockies were more than willing to participate. Patterns that took fish included: pheasant tails, rainbow caddis, frenchie, honey bug, and midges. This was a good way to wet our whistles until we take the big roadtrip next week to pick up the new craft and hopefully get a float in on Plan C... Check out our site www.catchingchrome.com and Facebook for additional pix and report.
