I use both contacts and glasses, though if I'm fishing all day I opt for the glasses. For the glasses I use the clip ons that you can get at the eye doctors as opposed to the ones you get at KMart. They are a better quality lens. I've been using this for 15 years now. If I go for just an evening I usually use the contacts with polarized sun glasses until it get too dark to use them. Having polarized sun glasses is a definete advantage.
