As matters stand now, I haven't pulled up a comment on this story from any fly fishing site or 'blog....

Barbless,

Have you followed this story on PAFF? We've been talking about it.

This isn't a new story and has popped up with public meetings since the proposal emerged last year. We've discussed it at length on this forum and I posted the address to the good folks at DEP some time ago (although it doesn't hurt to post it again). Your post seems to imply that nobody is paying attention and the farm will be a fait-accompli. There is strenuous resistance to this proposal. Both Cumberland Valley TU and Big Spring Watershed Association are vocal opponents. To be sure, the region around BS is agricultural with a conservative, pro-farming constituency...but it's not a done deal.

Again, please contact DEP and voice your opinion. Consider supporting BSWA and CVTU.
