I headed up to Green Lane today for some crappie on the fly rod, I got few but it was slow. I was hesitate to go to the fly only section because I figured the suckers should be starting to move upstream. Well, they are there and everywhere. I got about 30 suckers, while trying to catch some trout. I did get three rainbows and 5 little browns. Stones and a few caddis were around, but fished sucker spawn and caddis nymphs. Nice to see the trout from last year are still around. water temp. felt in the 50s and was 60 degrees outside and sunny.
