Okay, you convinced this "clueless new guy" (I'll skip the douchebag part, ok?) to go to Amazon and place my order for one of Meck's books, PA Trout Streams and Their Hatches in paperback, so that I can carry it in the back of my vest.

Only thing is, I'm going to have to look for some good-sized trees to hide behind when reading it stream-side! 😊

Charlie Meck's pocket guide is a great little book to carry on stream. Light to carry and easier to conceal behind a tree while reading to avoid that clueless new guy douchebag look.

All of the others mention are must haves around the house.
