I don't own a lot of these kind of dvd's so I can't speak to everyones taste...but wow! I decided to buy the three pack which is Night of the Hex, Musky County and Heart of the Driftless.

Again, for my tastes Heart of the Driftles is excellent. I like that fact that the driftless area is the focal point but the two features come at it from two completely different angles. Heart is a straight up documentary about the area and those who protect, restore and fish it. It's beautiful to watch, I love the camera work, it has a great sound track and though I've never been to the area, he does an amazing job of making you feel like your there...if that makes sense.

Reverb is everything I hoped it would be after I saw the trailer. I'm not a big punk rock guy but I was interested in the story...and it delivers, very very cool piece. It's about the band, their history, the punk scene the ups and downs and their passion for fly fishing in the driftless. Heck, the singer even started a fly rod company. I checked out their website...pretty cool. I like these kind of stories. It's not always about far off places and big fish.

There is also another feature and some extras on the dvd that I haven't gotten to yet.

Musky Country...wow! I'm not a musky guy and probably never will be but it doesn't matter. I heard a lot about this dvd and now I know why. This might be one of the best dvd's I've ever seen.

I know this one has been out for a while but if you have a chance to see it I would highly suggest that you do. There is a lot of passion, a lot of content and pure goodness in the is dvd!

I haven't gotten to the Hex dvd yet. It's short at 32 minutes but I'm looking forward to seeing it. I've fished the Hex one time in Michigan many years ago and unfortunately it didn't come together but thats the fun in chasing bugs.

Anyway, sorry for the long ramble but I think these are all great dvd's. I can only imagine the work that must go into them. I was also impressed that the invoice inside the package icluded a hand written note thanking me for the purchase. I thought that was very cool so I emailed Robert and got a very nice response back.

So again, this is just my opinion but I would highly recommend any of his dvd's.
