In the slightly over a year that I've lived here, I think I have 6 trips logged on Valley Creek. My totals, in order, were:

0, 18, 6, 12, 5, and 10.

I'm chalking up the 0 to a learning curve, but probably being a little evasive in doing so. If you line up the days from fewest to most, it also happens to correspond PERFECTLY to the cfs on the gauge that day, from lowest to highest. The secret to Valley is high water, at least for me during fall/winter/spring. I haven't fished the summer yet.

YMMV

Biggest fish: 15"

Average fish: 7-8"
