Fredrick,

I will give you an easy nymphing leader formula that works well and is extremely simple. The ratio is approx. 50% butt section and 50% tippet.

For your butt section use 3 to 5 feet of 20lb maxima chameleon or blue stren. From there I blood knot a bicolor sighter but since you are new I would skip this step and attach a 2mm tippet ring.

Now attach 4X or 5X tippet that is 2X the depth of the water you are fishing....in PA probably 3 to 6 feet of tippet. It's as simple as that. When you get more comfortable you can add dropper tags off your tippet. I use this simple formula for tight line nymphing and it works great.
