Yes I had a blast for two days, yesterday can't buy a fish, the water surface temp. went from 53 to 64 in one week , no crappies in the cove so we fished all along the edges of some other coves and main lake points, nothing, The Bass were shallow and a lot of them, most were in pairs, I think they will spawn early too, couldn't get any on crappie flies, wish I brought some crayfish patterns, Lake Marburgs water was gin clear to 30 " . Its a rough lake sometimes its good and then it can shut down overnight,
