We are proud to introduce our first pro staffer, Camille Egdorf!

Camille grew up fly fishing; starting at the age of 6 at her parents' lodge on the Nushagak River in Alaska where she spends 4 months of every summer guiding for trout, grayling, salmon, and more. Between her time spent in Alaska and her home in Montana, she has developed skills and passion that are an inspiration to anglers of all experience levels.

Camille will be putting our gear through some serious testing, and working with Evan, our product development manager and on-staff pro to continue to improve and expand our product line. We're excited and honored for the opportunity to work with such a passionate, experienced, and humble young guide!
