Fishing was over the top on Tuesday. Gannoms, Hendickson and Quill Gordons. I was out fishing with some friends and had my best day on Penns with 4 large fish coming to the net. They were 17, 18, 18 and 21 1/2 inches. All caught off the top. Fishing slowed down on Wednesday due to the wind. The mayfly hatch was put down but the Grannoms were still hatching. Overall I caught 26 trout over two days. Water level was low, like first week of June level. Temps were good, 52 to 58 degrees late in the day. I love "Hunting Heads"
