Which cheap line to buy and DT or WF

URL:

I'm going to replace my line on my old #7 rod. I'm going to get a #4 or #5 rod later so I don't want to spend much for a line.

I need a #7 line and was considering trying a DT. I was going to get the "Cabella's Prestige Floating Fly Line - DT" for \$29.99. But with tax and shipping it comes to \$41.28...

So I figured dicks sporting goods would have something less expensive. Any recommendations???

Also,

I read that DT or WF makes no difference at short distance roll casts. I don't know I still want to try it. does anyone like DT over WF and why.
