bounce rigs fro nymphing?

anyone ever use the 'bounce rig' for nymphing in PA? I was in Utah last week fishing the Provo River, and the bounce rig is big there. I liked fishing with it as it prevented alot of the normal hangups that I get when nymphing - but after reading a bit about the rig online..I'm not sure it would be as effective in PA waters. Does anyone have experience with bounce rigs in PA? I'd love to hear about trials/tribulations as well as leader formulas for constructing my own bounc rigs...
