Sorry if you mistook me for saying a four wrap blood knot is bad, not what i meant at all.an yes i know how to tie knots properly as well as always spit on them before i ever even tighten them.The 5/7 Blood Knot is for ex tieng 5x to 3x or like that an believe me it does work.I also know you can say what you want but up On the Great Lake Tribs where you deal with large Salmonids on a constant basis i am speaking particularly of Lake Ontario sooner or later a blood knot will fail .  
Murphy can strike when you least expect it, give it a try, especially when yer streamside an run out of say 5x and have to knot 6x to 4x..... i wasnt trying to demean your methods only to introduce another option is all.  
I also enjoy using a surgeons knot too
