Exit fly shop make quick right, then another quick right walk 20 steps straight.....oops you are now in the middle of the stream. Better make it only 10 steps. 

When you asked how your directions were I thought you meant HA's directions. I did not see your post this morning.

I guess I would have wound up in the stream which I did..lol. I thought the fly shop was a few blocks away. My waders are history. After 5 years (2 in the attic) they are no longer water proof. Think I will get some waist-highs at Cabelas.

Anyway, thanks for your help and the dry fly. I really appreciated it. I've been focusing on the wrong things and I was happy with my casting today.

It was also nice to see the LL was not as low as the Pennypack or the Tohicken.
