I bought a ECHO 4-6 from cabelas's a few years ago. It is a large arbor and I love it. I use it for all my 4 and 5 wt lines. Plus, its only \$70 and extra spools are \$40. It has an outstanding dial drag. Matter of fact, next time I place an order to cabelas, I'm picking up an extra spool for pike and steelhead. They also make a reel for 6-8 wt line.

The only downside I have from my large arbor, is that frequently the excess line will wrap around the butt of the rod during the forward cast. I hate that.
