If ya have a buddy drag him along for the ride. Its alot easier to get started in this. I had a really hard time hooking my first musky last yr. TD jumped out to 10 musky lead before I stuck a pig. I was there for just about everyone he caught. Thats the part the sucks.....The total randomness of the fish outta 2 people fiahing together 1 guy can have fallows swipes and even caught fish. The other dude is caught holding the bag. Thats the way it is.....Its mental toughness, not to lose focus on your fly and the water around it. They always catch ya day dreaming and bs with your buddies. I swear these fish are masters of cathing ya off guard!
