ALWAYS have a light source when fishing. I probably carry 2-3 headlamps and some extra batteries in my pack just in case.

Pat showed me my first spinnerfall on Spring at the JAM 4 years ago. I just was just in awe watching all these fish hit the water that I could barely fish. It was awesome! Now I chase after that over and over again every year.

Tie up some basic rusty spinners in sz 12-18 and it should cover you for most spinnerfalls. (Some exceptions are Tricos because they're small and black, and Green Drakes because they're big and white.)
