Dear pcray,

Hot damn, we're long overdue for a good "onion" snow.

The last one I remember was back in 1993 when I lived in Binghamton and we got about a foot of snow on April 27th or 28th.

Getting around was pretty tricky for a day because they didn't plow. They already had pulled the plow frames off the dump trucks but it all was gone in a day or two and it did what it was supposed to do, it recharge the groundwater.

I highly doubt we'll see any snow here in Harrisburg but I welcome it up the line. The Susquehanna down here is already below 4 feet, which historically is the July 4th "target" level, and we desperately need some water.

Regards,

Tim Murphy 😊
