The buford and the hangtime (ie optic minnow) are the stepping stones to the big trips' and doubles. After you get a eye how the materials are tyed in order to get the "triggers". Its easy to develop your own variations.

I pretty much left the singles behind. I never caught a toothy on the single hook fly. After you get used to casting and more effiecient @ huckin'. Its a natural progression. All mine have come on big doubles and I have started to fish triples this season. With 1 fish hooked on triple.
