new. can anyone instruct me how to upload photos from photo bucket?

Use the image manager in the Reply module.

Click Reply on bottom right below post (Do not use quick reply at bottom). Above the text editor are two orange icons. Click on the one on the left and insert the URL code from the Hosting site for the pic. Click OK, Then OK two more times. This will place the pic into the post at 300 pixels and is clickable to expand to larger size.

If you just copy the IMG code into the post it blows the margins inserting the pic at Hi res. This is not preferred and requires us to go in and edit it.
