Light Cahill - *Stenacron interpunctatum* (AKA: Pink Cahill/Orange Cahill)

Author: : Maurice

Date: : 2012/4/23 22:40:56

URL:

Saw a couple of these today mixed in with the #16 sulphurs. I used a #14 yellow CDC wing comparadun. The fly on the hook keeper is the one I caught three on right before the orange bug floated up to me.

I am choosing female Light Cahill (*Stenacron interpunctatum*) based on Mottled wing, two tails and barred front legs.

Pretty fly.
