you need to move upstream from gravel hill.

back by valley glen where the old dam once was it gets rather deep.

that area is known to produce tigers. above that, yet below the camp ground is another pretty good spot.

although harder to get to since the farmer posted that lane back to the creek many years ago.

a buddy and i hauled out several 20+"ers back there...also several years ago.

the area below gravel hill is a waste land till you start getting down towards the rt743 bridge.
