Which gloves have you tried that haven't worked?

While I HATE fishing with gloves; when I get really cold, (which isn't often), I use my Simms Polar Fleece with the fold over mitten gizmo.

Their gloves have been redesigned for 2007 so the new version of what I have is the Windstopper Foldover Mitt.

When all else fails I fire up the Jon-E Giant which gets hot enough to cause 2nd degree burns which feel great when it's freezing! I also make sure the flask is filled too!
