Fished Montour Friday evening from 6:30-8:30. Flow was perfect, water color was clear with a bit of green tint. Overall great conditions. Saw some splashy rises so figured I should try a #14 elk hair caddis. Went 2 for 5 on that EHC. Met a friendly gent who hooked me up with some beadhead caddis pupa nymphs. Went 1 for 3 on that under a fish pimp. Only saw 5 other guys. So it was a good couple of hours fishing with decent numbers of fish, relative solitude, rising fish and good flows. Good day!! The streams are in a little better shape now that we got some rain. So get out in the next couple of days and give em hell!! The fish are looking up but you can still have some success nymphing too if you want. I'm starting to get addicted to fishing dries!!
