Nick and I just spent two days on the Manatawny and Tulpehocken Creeks guiding. Size 16 CDC Sulphur was the hot fly. Lots of fishermen on both creeks. Could not fish the Manny Saturday due to off color water from the thunderstorms Friday night. Largest fish caught was a 14 inch brown. We had a great time with this husband and wife who were fly fishing for trout for the first time. We found rising fish on the Tully all day...photos on my Facebook page.
