Zingers (Simms and Fishpond)

I am looking for a new zinger. Broke my third one this weekend and looking for something new. I am thinking about either the Simms retractor or the Fishpond 360.

I have a Fishpond chest pack so I do have compatibility there. However, I can get 2 Simms for the price of the Fishpond.

Anyone using either and want to share what they think? How does the elastic coil hold up? I got to pull on the Simms the other day and it has nice spring back but don't know how long that will last. Haven't had the chance to see the Fishpond, but like there stuff. Same spring action?

Thanks!
