When you wrap the strip how do you compete with the leather. Maybe the fur i used was too thick but i was left with a leather belt if you will when i wrapped it. I tied the fur in a snipped the leather part out. I dubbed over the thread then added the hackle to cover up.

Well the fly did work. I have attached some brookies from friday on my 15 min tester on a recently stocked stream. Landed 3 lost 2 others.

The catch and release picture wasn't planned. I wanted to get a picture of the fly in the fishes mouth for this thread but he plopped back in. I just winged a shot off with my droid and well i got lucky can you spot the little bit bigger brookie?
