try even smaller midges, size 22, 24 in different colors and patterns (cdc midge, or thread body and 3 or four pieces of elk hair for wings), i know you said you tried a smorgasbord of flies, did you throw any terrestrials, sometimes even the most selective trout cant turn down a size 14 crowe beetle. Also consider sky conditions and water clarity, was it bright/sunny?, sometimes these conditions cause a lot of shadows from your line that tip the fish off, in that case, not much you can do
