If you go through the family Heptageniidae on troutnut: <a href="http://www.troutnut.com/hatch/39/Mayf">http://www.troutnut.com/hatch/39/Mayf</a> ... <a href="https://www.troutnut.com/hatch/39/Mayf">s-Quill-Gordons#specimens</a>

There are quite a few specimens that look like your first one.

The second one could be the same family, but I think its: <a href="http://www.troutnut.com/specimen/599">http://www.troutnut.com/specimen/599</a> A female iso or Slate Drake (the shape of the eyes and the long antennae is why I think its a Slate).
