It looks like I have two musky/pike die hards. If i could get you into prime pike/musky waters would you be willing to share some secrets? I have a canoe and can row for half a day while you flail some water w big flies for pike/musky. In return some knowledge on how to catch these critters. BTW I live in NW pa which is prime toothy critter country.

Pafornisco and DT pm me.

Thanks,

Greg
