Imho, Windcutters and Triangle Tapers do have a very good place, that would be on big water like rivers that get breezy. Delaware/Lehigh..also Pine Creek, Broadhead, are ones that come to mind where i use the wincutter or triangle taper and leave the double taper in the bag.

I recently discovered the Triangle Taper to be a favorite because it will single hand Spey cast as well as overhead cast too ,fishes indicators, and shoots streamers out where i need them.
