I fish with WF Rio Gold. The color of the line is olive and that is what I prefer. The first thing I do when I buy fly line is cut off the welded loop and nailless nail knot a 7 inch 20lb Amnesia test piece of mono with a perfection loop. I then coat both knots with UV knot sense and never worry about it again.

I attach my leader by a 3 turn improved clinch knot to the perfection loop. It's smoother through the guides than a loop to loop.
