I'll get in touch with the President. When and where are your meetings? I've been a little crazy with development. I'm building a GPS Gamelands Guide under contract for the PA Game Commission for iPhone and Android. I did have some nice fishing on the upper reaches of both the Perk and Saucon lately. Plentiful "Class A" Browns on very small streams. It's challenging fishing with low overhanging trees so think small on your gear if you explore them.
