Those are gonna be too big, I think. I wear about a size 9 in shoe size, plus or minus a half size depending on sizing. I have duck feet, short and wide. 8 1/2 wide is probably right, but I often find myself with 9's or 9 1/2's to get the needed width.

I always loved Chota made boots, perhaps because they're cut wide. But they've just gone so high in price.
