I have had it for about 1 1/2 years now. It is great for a) finding creeks around your area you did not know about and b) finding creeks in areas of PA that you are unfamiliar with but happen to be traveling in. It also take you close to access points for the streams.

I have the Garmin version so no iPhone reception issues.

This has been my experience over a 1.5 year period as well. I have the card installed in a Garmin unit. Often I travel throughout PA in areas that I have never been. When I have time to fish I will leave the program on hit random streams. It's pretty cool. I am not sure how valuable the updates would be as the only thing that is really going to change from year to year is the occasional special reg change and/or addition/deletion of a few class a.
