Thanks man, any recommendations on the heel wedge and where I could get it? Willing to give it a shot for sure. Probably would get 3 or 4 pairs and put em in all my shoes rather than trying to transfer em all the time.

When I went to the doctor before he prescribed inserts with a high arch built in. This did NOT work, I think it made it worse.

Thank you, by the way, I feel like I am closer to understanding this thing than I ever have been. It's not exactly been a terrible handicap, but certainly a chronic annoyance!
