Since many people curse midges...I'm not sure if I did you any favors haha

If I'm in the mood for midges, I prefer a small parachute with no tails. #22 grey body, grizzly hackle would be a general go-to. There's all these names like "I can see it" midge (ICSI) and Hi-vis midge etc...but there all pretty much small parachutes with a fancy name...

Also, Al's rat...

Terrestrials should be going already or anytime now as well
