Interested in a trade? Would be willing to throw in a little bit of cash if necessary. I have an Allen rod. Unused, other than test casting in the yard. ATS series, which is their cheaper model and goes for around \$160ish I think. Medium action. A little too soft for me, and size and weight are duplicates of other rods I have that I like better. I won this rod at the jam.

Will verify tonight, but I think it's either 8'6" or 9' and a 5 wt.

My main brookie rod is a 7'6" Cortland which I really like, but I wouldn't mind having something shorter in the arsenal. And I love my longer GL3.
