Were would you put the all mighty hellgrammite on your tree of bugs and flying critters.I see lots of other bugs on here but never any info on a hellgy.

Right up on top on the tree of bugs in river and streams that have them (many do) for trout, but especially smallies.

Hellgrimite patterns really work well. Fish a black, dark olive or brown bugger where helgies hide and smallies swim....Kaaawok!.....fish on!
