I live in the town of Clearfield and have visited several Marcellus well sites in the area, including the one near Elliot Park that blew out a few years ago.

PA Council of TU, PATU chapters, and National, TU have all been involved in the Marcellus play from the beginning. If you want to review what is going on, National TU has a web page devoted to Marcellus drilling at - [http://www.tu.org/conservation/easter ... n/marcellus-shale-project](http://www.tu.org/conservation/easter...n/marcellus-shale-project)

National TU has two full-time employees: Katy Dunlap, Eastern Water Project Director and Mitchell Blake, Marcellus Shale Field Organizer. Both work full-time on the Marcellus drilling issue. Their contact information is in the lower right corner of the TU Website. We have bi-monthly teleconferences to review the Sportsmen Alliance for Marcellus Conservation.

PATU chapters are monitoring streams in the Marcellus play all around Pennsylvania. Mitch Blake is going around the state giving seminars on the subject. All this information is available on the Website.

So yeah, we're involved. If you want to get involved, contact Mitch Blake. --- Ken Undercoffer
