I think with your boat you would be able to easily launch from any of the ramps. My BIL has a boat similar to yours and has no problems launching w/ his minivan as the tow vehicle. CPR is right the lake is basscar heaven on a weekend. If you want to avoid the major weeds stick to the lower half of the lake, however I have found that the fishing on the upper half is better.

As for patterns senko styles worms and tubes worked well a few years ago. Now I typically use a bobber and worm with my 5yo out of our canoe.
