I pretty much carry al the same "stuff"as everyone else. I do always carry a net on me, because I lost a few fish that I could have landed if I had a net with me. The net that I carry is cheap, under \$15 I beleive, it folds into a figure 8 then gets stored into a holster. The net isn't that large, but I have landed plenty of Steelhead in it. This net is made right here in PA: <http://www.gudebrod.com/fishing2005/Accessories.htm>

Some members mentioned insect repellent and it reminded me of a ruined line that I have. DO NOT get deet on your line. Wash your hands as best as you can before you start to fish after applying the repellent.
