Upsidedown seems to work well. Barbless hooks help. Do you want to enjoy the fight , play them out? use heavier tackle?It can be difficult enough to catch them in the first place, let alone.... bla bla bla. I take each situation individually. Sometimes you just kill them without trying and either you eat them or an eagle does. FYI, I like to catch rainbows at an orvis outfitted anglers feet, pull up rodtip, they jump at thier feet, and they wade away talking to themselves and shaking their heads. With my homemade rod and Unkle joes woodshed gear! And I'm good at it!
