Still have a smile on my face and every Saturday should be like this past one... great day, tons of fun and picked up a lots of good info. This was only my 3rd time fishing for trout exclusively as most of my time has been on the WW Neshaminy practicing my trout technique; have yet to fish with poppers. Fishing WW, those guys just bite and get hooked but from listening, reading and fishing; the trout on the LL (and other places fished hard) are very particular.

Is there a difference in trout located less fished areas?

Saturday, with the water clear & low, and my mending 'perfected' thanks to delta dog, I was able to see trout rise to my fly (beetles and ants with no lil luck on tricos). Some got close but turned away for whatever reason but four times what felt or looked like a taste, I couldn't hook it. Not sure if it was my timing, my technique, or something else.

Is this just going to come along with more trout fishing experience and practice on the water mixed in with a lil luck?
