Thanks all,

I saw the delorme maps and figured that was the route i'd take. I'm probably gonna get one.

As far as the computer maps...

There are two things that people laugh at me for. I'm a fisherman who doesn't eat fish, and I'm a computer programmer who doesn't use the computer (i get enough at work)... Google earth is nice, but I found that the only images of some of my home streams are pretty low res.

Thanks for the AAA advice. I think my dad is a member. I'll talk to him.
