For what it is worth is a great project and hope more work is done up and down the stream. Should be with the \$600.000 I heard had come in.

Still reproducing trout is a great thing and why threaten that. I was guiding up there Sunday and is was not "Stupid" rainbows but brook trout that made my client bored. We had one brook take a fly three times. I fine the rainbows to be for picky than the brooks myself. I guess we have our own opinions.

Hey we did some great work on Falling Springs today and that does favor rainbows.

Mike
